

Adam Zborovsky

Full Stack Web Developer

[Email](#), [Web Portfolio](#), [Github](#), [LinkedIn](#)

TECHNICAL SKILLS

- **Frontend**
JavaScript, React, HTML/CSS
- **Backend**
Node.js, Express.js, Python
- **Databases**
MongoDB, Firebase, SQL
- **Tools**
Git, Docker, REST APIs, Postman

LANGUAGES

Hebrew (Native)
English (Fluent)
Russian (Fluent)

SUMMARY

Full stack developer with 5+ years of coding experience and multiple deployed web applications. Built and deployed production apps with React, Node.js, Express, and MongoDB — including JWT authentication, REST APIs, Docker containerization, and cloud databases. Looking for a junior web developer role where I can contribute immediately and grow.

EDUCATION

Full Stack Development - HackerU, 2025 | 535 hours

- 8-month intensive program covering JavaScript, React, Node.js, MongoDB, REST API design, and deployment.

PROJECTS

PlanD (2025) — Live at [pland.adamzborovsky.com](#)

Full stack group coordination app where users mark availability, suggest activities, and vote on plans. Deployed to production with real users.

- Built JWT authentication with secure cookie storage and role-based access control (user/admin)
- Designed REST API with 10+ endpoints across 3 resource groups (users, dates, ideas)
- Implemented automated data cleanup job with 3-day expiration policy
- Dockerized both frontend and backend with Docker Compose
- Tech: React 19, Express, MongoDB Atlas, Firebase (image storage), Formik/Yup validation

MegaBead (2025) — Live at [megabead.adamzborovsky.com](#)

Full stack e-commerce platform for custom jewelry design with interactive bead builder, shopping cart, and admin dashboard.

- Built complete e-commerce flow: product browsing, cart management, checkout with payment/shipping data
- Created admin panel for product CRUD with image upload via Multer
- Implemented React Context API for global auth and cart state management
- Designed 16 API endpoints with role-based authorization
- Tech: React 19, Express, MongoDB Atlas, JWT auth, Docker (Alpine)

All project can be seen and tested in my portfolio or Github
